

Deepansh Mehta

Senior Backend Systems Engineer | New York | deepansh.mehta@email.com | +1 (555) 123-4567

Professional Summary

Senior Backend Systems Engineer with 8+ years building scalable distributed systems using Go, Python, Kubernetes, Docker, PostgreSQL, gRPC and Redis. Experienced in cloud-native microservices processing millions of requests with strong focus on performance, reliability and automation.

Skills

Go, Python, Kubernetes, Docker, PostgreSQL, gRPC, Redis, Rust, Elasticsearch, Kafka, AWS, Git, Jenkins, Prometheus, Grafana, Linux

Experience

Senior Backend Engineer – TechNova Systems (2022–Present)

Designed scalable microservices, optimized PostgreSQL, implemented Redis caching, Kubernetes deployments, Kafka pipelines and gRPC services processing 15M+ requests/day.

Backend Software Engineer – CloudStack Technologies (2018–2021)

Built REST/gRPC APIs, Dockerized services, deployed on Kubernetes, optimized databases and CI/CD pipelines.

Projects

Distributed Order Processing Platform • Cloud Monitoring Platform

Education

B.Tech in Computer Science

Certifications

AWS Certified Developer • PMP
