

JOSEPH WHITE

Cloud Software Developer | AWS | CI/CD | DevOps | Satellite Data

@ Email linkedin.com San Jose, California

SKILLS

AWS EC2 AWS Lambda

DevOps Practices YAML

JSON Git

KEY ACHIEVEMENTS

Cloud Migration Success

Led a team that migrated over 10 legacy applications to AWS, reducing operational costs by 30%.

API Development

Developed 15 APIs to support satellite data applications, improving data access speed by 40%.

CI/CD Pipeline Implementation

Implemented CI/CD pipelines using AWS services which decreased deployment errors by 50% and improved release frequency.

Security Compliance Audit

Conducted security assessments that resulted in achieving 100% compliance for cloud applications, enhancing data security protocols.

CERTIFICATION

AWS Certified Solutions Architect

Achieved AWS Certified Solutions Architect from Amazon to design and deploy secure applications.

Kubernetes for Developers

Completed Kubernetes for Developers from Google Cloud, enhancing skills in cloud-native application deployment.

SUMMARY

Cloud Software Developer with over 5 years of experience and expertise in AWS technologies. Renowned for significant contributions to major migration projects, achieving a 30% reduction in costs. Proficient in building serverless applications and CI/CD pipelines, I thrive on innovative cloud solutions.

EXPERIENCE

Cloud Software Developer

Amazon Web Services

06/2021 - Present Remote

- Designed and built serverless applications leveraging AWS Lambda and API Gateway, enhancing response times by 25%.
- Developed architecture components for scientific applications leading to a 40% increase in processing efficiency.
- Automated deployments using CI/CD methodologies which reduced the time between development and production by 35%.
- Implemented monitoring solutions in AWS that improved system uptime to 99.95%, enhancing reliability for user access.
- Collaborated with a team of scientists to deploy cloud solutions that processed satellite data and improved analytical capabilities.
- Performed rigorous code reviews and refactoring sessions ensuring adherence to best practices, resulting in higher code quality.

Software Engineer

Google Cloud

07/2018 - 05/2021 Mountain View, California

- Developed containerized applications using Kubernetes leading to a 30% enhancement in deployment scalability.
- Collaborated with cross-functional teams to streamline cloud application features, improving user satisfaction metrics by 20%.
- Utilized DevOps tools to establish continuous integration workflows, resulting in a reduction of bug reports by 15%.
- Managed source control with Git and Jira, ensuring enhanced tracking of development projects and faster issue resolution.
- Supported the migration of critical data to cloud environments, improving disaster recovery solutions by implementing backup strategies.

Systems Developer

IBM

01/2016 - 06/2018 San Jose, California

- Engineered solutions for deploying complex applications on AWS, enhancing performance metrics by over 30%.
- Worked on large-scale data processing projects resulting in significant insights being derived from satellite operations.
- Leveraged YAML and JSON for configuration management, improving team efficiency in setting up environments.
- Assisted in testing and hardening cloud security measures which resulted in improved compliance with industry standards.

EDUCATION

Master of Science in Computer Science

Stanford University

2018 Stanford, California
