EDUCATION

Bachelor of Science
Computer Science

Carnegie Mellon University

📅 2011 - 2015

📍 Pittsburgh, PA

SKILLS

- Apache Camel
- AWS Lambda
- Apache ActiveMQ
- AWS API Gateway
- OpenShift
- Bitbucket
- MySQL
- AWS CodePipeline
- Prometheus
- HashiCorp Vault

WORK EXPERIENCE

Java AWS Integration Specialist

EPAM Systems

📅 2021 - current

📍 Newtown, PA

- Designed and implemented secure API endpoints using AWS API Gateway, ensuring data integrity and achieving a 36% reduction in unauthorized access attempts
- Installed a new architecture with AWS Lambda, facilitating a 28% reduction in the application's response time
- Spearheaded migration of databases to the MySQL platform, **enhancing data retrieval performance by 37%**
- Embedded Prometheus for system monitoring and alerting, resulting in a 19% quicker detection of potential system issues

DevOps Engineer

Unisys Corporation

📅 2018 - 2021

📍 Blue Bell, PA

- Utilized Apache Camel for microservices, streamlining system functionalities and application integration
- Rolled out Bitbucket as a source code repository, **enabling collaboration among teams and increasing code review efficiency by 32%**
- Delivered solutions through OpenShift, which contributed to a 64% increase in application deployment speed and saved \$3,362 in infrastructure cost
- Deployed HashiCorp Vault to manage secrets and protect sensitive data, reducing data breach risks by 34%

Technical Assistant Specialist

AmerisourceBergen

📅 2015 - 2018

📍 Chesterbrook, PA

- Enhanced message-exchanging abilities between various applications by leveraging Apache ActiveMQ, increasing application interaction by 36%
- Fostered scalable application deployments using OpenShift, **reducing deployment time by 27% across all web applications**
- Ensured secure processing of web requests with AWS API Gateway, increasing system response times by 38%
- Designed and implemented automated CI/CD pipelines via AWS CodePipeline, reducing release cycles from three weeks to 12 days, saving \$28,864 in resources
