EDUCATION

Bachelor of Science

Computer Science and
Engineering

University of Washington

📅 2015 - 2019

📍 Seattle, WA

SKILLS

- Kotlin
- Java
- Spring Boot
- Gradle
- Maven
- IntelliJ IDEA
- Android Studio
- Jenkins
- Docker
- Kubernetes

WORK EXPERIENCE

Kotlin Java Developer

ThousandEyes

📅 2022 - current

📍 Seattle, WA

- Developed Android applications in Kotlin to leverage safe calls, **reducing crash rates by 21%**, compared to previous app performance metrics.
- Migrated the organization's monolithic applications to microservices architecture with Spring Boot, achieving a 3-week faster time to market for new software solutions.
- Deployed network monitoring tools using Kubernetes to autoscale existing services and handle 667K+ simultaneous users.
- Used Android Studio for performance profiling and tuning, leading to a 19% improvement in app responsiveness.

Associate Java Developer

Rivian

📅 2019 - 2022

📍 Seattle, WA

- Built various software components with the help of IntelliJ IDEA, shortening the average feature release time by 24 minutes.
- Helped 3 senior developers optimize Rivian's vehicle diagnostics system, enabling real-time issue detection.
- Integrated Docker containers into the cloud environment, **saving \$41,448 in infrastructure costs**.
- Troubleshoot minor technical glitches, gaining high uptime rates on all operating vehicle systems, decreasing customer complaints by 11%.

Data Entry Clerk

Redfin

📅 2018 - 2019

📍 Seattle, WA

- Entered 1,335+ real estate listings every week with a 97% accuracy rate .
- Automated repetitive data validation processes using Java scripts, **eliminating 4 manual tasks**.
- Introduced Gradle-based build scripts to verify data logs of scanned documents, maintaining an all-time low discrepancy rate of 2.8%.
- Worked with agents to ensure timely entry of new rental listings, expediting client acquisition times by 6 days.
