Google Cloud SQL
Apache Kafka
Maven

WORK EXPERIENCE

GCP Java Developer

Woongjin, Inc.

2022 - current / Los Angeles, CA

- Optimized queries on BigQuery, expediting data processing and **saving Woongjin \$46,391** every year in computing costs.
- Integrated 22 RESTful APIs using Java, ensuring effective data interoperability that met all industry-standard data formats.
- Built CI/CD pipelines with Maven, shortening the average release cycle from 13 to 6 days.
- Introduced a Google Cloud Storage-based data archiving solution, reducing digital storage costs by \$12,381.

Software Developer

Tentek, Inc.

2019 - 2022 / Los Angeles, CA

- Adopted Apache Kafka for real-time data streaming, enabling the company to update performance dashboards 3 days quicker.
- Used complex Google Cloud SQL database queries, which helped the company's primary web application to support up to 11,549 concurrent users.
- Implemented Cloud Pub/Sub messaging systems for asynchronous communication, **bringing down system latency from 112 ms to 33 ms**.
- Leveraged automated error-logging frameworks, speeding up application debugging times by 2 days.

Web Developer

Avila IT

2017 - 2019 / Los Angeles, CA

- Mitigated website security vulnerabilities by 72% via regular audits and enforcing best practices.
- Designed real-time cloud dashboards with the help of Cloud Functions, leading to **46-minute quicker business updates**.
- Engineered load-balancing solutions in GKE, expanding existing user capacity by 19%.
- Incorporated cost optimization strategies on the Google Cloud Platform, cutting down monthly cloud expenses by \$9,717.
