WORK EXPERIENCE

Lead Java Developer

Deloitte

Atlanta, GA | 2021 - current

- Led the development of a scalable microservices architecture with Spring Framework, achieving a **22-minute decrease in deployment time**.
- Migrated the company's monolithic application to a microservices-based solution, lowering maintenance costs by \$19,334.
- Directed a team of 6 Java developers to deliver multiple high-impact projects ahead of schedule.
- Automated performance testing using Jenkins, finding and resolving critical bugs within 18 hours or less.

Java Developer

Infosys

Atlanta, GA | 2018 - 2021

- Deployed Java applications on Kubernetes clusters, improving the scalability of the 3 mobile applications.
- Conducted 116 unit tests using JUnit, **achieving 97% code coverage** for web applications.
- Used Kafka Streams to design fault-tolerant systems, ensuring all applications processed 24K+ concurrent messages without delays.
- Integrated Docker containers with various automation testing tools for seamless deployment, expediting staging time by 51 minutes.

Junior Java Developer

Goli Tech

Atlanta, GA | 2016 - 2018

- Resolved 25+ bugs per sprint, increasing overall client satisfaction scores by 9%, according to board meeting metrics.
- Helped seniors incorporate Spring Security with Hibernate for user authentication, **curtailing unauthorized access incidents by 27%**.
- Supported the development of a new web application that processed daily transactions with 96% accuracy.
- Assisted in debugging Java-based applications, resolving 13 production issues within one week.
