WORK EXPERIENCE

API Java Developer

Genoa Employment Solutions Inc.

📅 2023 - current 📍 Ann Arbor, MI

- Automated deployment pipelines using Jenkins, shortening major release cycles from 2 months to 27 days.
- Created API documentation on Swagger, enabling new developers to learn the company's APIs 4 days quicker.
- Used Apache Kafka to develop a messaging system capable of processing 10,589 transactions per second.
- Optimized existing RESTful APIs, **expediting the average response time by 0.6 seconds** and refining overall user experience.

Full Stack Developer

Outlier AI

📅 2020 - 2023 📍 Ann Arbor, MI

- Developed a microservices-based architecture using Java, reducing annual system downtime incidents by 28%.
- **Improved API performance metrics by 33%** via consistent optimization and rigorous testing with Postman.
- Leveraged multiple caching mechanisms that mitigated database hits in a high-traffic system by 49%, improving application speed for end-users.
- Monitored application performance with Dockerized tools, finding IT issues 19 minutes faster than previous techniques.

Backend Developer

Charles Schwab

📅 2018 - 2020 📍 Ann Arbor, MI

- Worked with front-end developers to incorporate GraphQL endpoints, curtailing monthly API calls by 18%.
- Managed performance tuning on backend systems, enabling the primary system to support 21% more concurrent users during peak trading periods.
- Introduced Maven to manage project dependencies across 6 microservices, maintaining consistency in high-quality code.
- Held in-depth debugging sessions with colleagues, **resolving 91% of critical bugs** before they impacted users.

EDUCATION

Bachelor of Science

Computer Science

University of Michigan

📅 2014 - 2018

📍 Ann Arbor, MI

SKILLS

- Java
- Spring Framework
- Maven
- Apache Kafka
- RESTful APIs
- Swagger
- JUnit
- Postman
- Docker
- Jenkins
