

Terrence Coleman

Senior Data Scientist

c.man@email.com

(123) 456-7890

Brooklyn, NY

[LinkedIn](#)

Analytically driven data scientist with 10+ years of experience turning complex data into pricing strategy, predictive models, and actionable business insight. Improved pricing-driven revenue by 8.7% in a prior role and now focused on leading high-impact analytics that sharpen decisions and scale business performance.

WORK EXPERIENCE

Best Buy – Senior Data Scientist

November 2022 - current

Remote

- Led data extraction and evaluation efforts to save Best Buy more than 11M over the course of tenure.
- Partnered with product team to build a production recommendation engine in Python that improved the average length on page for users and resulted in \$450K in incremental annual revenue.
- Developed a customer attrition random forest model that targeted relevant product features, resulting in an **additional 2,544 customers** retained annually.

2U – Data Scientist

May 2018 - October 2022

Brooklyn, NY

- Conducted A/B testing to solve client pain points in learning platforms, and identified and recommended solutions to solve unclear platform roadmaps, which **reduced the bounce rate by 62%**
- Extracted data from 7 disparate sources and centralized it into a single system, streamlining data processing and improving reporting speed.
- Created and implemented decision tree algorithms using Python to enhance predictive accuracy for marketing campaigns.

2U – Data Analyst

April 2016 - April 2018

Brooklyn, NY

- Identified underperforming underwriting models across regional states and implemented predictive analytics to optimize processes, resulting in average 134K annual profit increase.
- Analyzed customer data to identify and implement process improvements that increased profit margins for a nationwide retention program by 8%.
- Developed and owned the reporting for a nationwide retention program using Python, SQL, and Excel, **saving an average of 60 hours** of labor each month

EDUCATION

University of Pittsburgh – Bachelor's, Mathematics and Economics

2011 - 2015

Pittsburgh, PA

SKILLS

Python: Flask, SAS; SQL - Redshift, MySQL; ElasticSearch; Price Optimization, Productionizing Models
