WORK EXPERIENCE

SQL Data Analyst

Newsela

📅 May 2025 - current

📍 New York, NY

- Modeled district and classroom usage data in Snowflake to identify trends, recommending specific changes to 5 curriculum modules that enhanced alignment with product and customer success strategies.
- Standardized content and engagement definitions, *lifting reporting accuracy to 98.7%* across educator-facing performance views.
- Analyzed reading-product usage data to create concise insights that guided renewal and adoption strategies for 12 school districts.

Data Analyst

Mint

📅 August 2023 - April 2025

📍 New York, NY

- Queried customer payment transactions and onboarding statistics with SQL, analyzing onboarding metrics to *pinpoint a 16% drop-off rate* among new users in personal finance workflows.
- Deployed interactive Tableau dashboards that visualized key performance metrics, engaging 41 recurring users in actionable weekly performance reviews.
- Synthesized funnel trends, experiment readouts, and stakeholder asks into actionable insights that guided product strategy for lifecycle and growth teams.

Business Intelligence Intern

KPMG

📅 March 2023 - July 2023

📍 Washington D.C.

- Compiled Excel workbooks to trace client revenue and expense anomalies, surfacing 27 exceptions for senior reviewers during audit support.
- Validated source-to-report tie-outs across financial datasets, *cutting manual review time by 6.8 hours* per close cycle.
- Validated discrepancies in client reporting files and escalated findings to ensure accuracy before finalizing engagement deliverables.
