WORK EXPERIENCE

Business Data Analyst

Fidelity Investments

Apr 2025 - current / Boston, MA

- Modeled service and client-behavior trends in MATLAB to evaluate operational drivers behind account engagement across 142.3K client records.
- Engineered predictive workflows with Keras that sharpened prioritization for advisor-support outreach tied to \$1.84M in opportunity value.
- Transformed ambiguous partner requests into actionable analyses, *enabling strategic decision-making* for product launches and operational improvements.
- Presented tradeoffs, limitations, and next-step recommendations in language executives could act on without follow-up clarification.

Business Intelligence Analyst

Liberty Mutual Insurance

Jun 2023 - March 2025 / Boston, MA

- Built interactive performance dashboards in Plotly to analyze changes in quotes, conversions, and retention rates for broker and digital channel managers.
- Identified and resolved reporting discrepancies in QlikView by auditing metric logic to source inputs, *reducing rework* during business reviews.
- Translated dashboard findings into concrete actions for underwriting and marketing partners, improving campaign-to-policy attribution by 6.8%.
- Standardized KPI definitions across marketing and sales teams through collaborative workshops to resolve misinterpretations and ensure consistent performance measurement.

Data Coordinator

Tufts Medical Center

October 2022 - May 2023 / Boston, MA

- Maintained patient, scheduling, and intake records with tight version control in PostgreSQL, ensuring data accuracy for 184 monthly reports.
- Streamlined recurring file transfers through Apache NiFi, *trimming manual preparation work by 11 hours* per month.
- Reconciled mismatched fields across operational and clinical source files before they reached reporting teams.
