WORK EXPERIENCE

Rockwell Automation – Data Quality Analyst

May 2025 - current

Milwaukee, WI

- Implemented validation rules in Informatica Data Quality that **cut manual exception review by 4.6 hours** per reporting cycle.
- Defined and enforced data governance policies in TIBCO EBX, resulting in a 34% reduction in data discrepancies for product and customer master data used across manufacturing and commercial reporting.
- Traced recurring data defects to transformation gaps and source-system mismatches, ensuring accurate data visualization on key performance metrics for stakeholders.

American Family Insurance – Data Analyst

July 2024 - April 2025

Madison, WI

- Standardized policy and billing quality checks in Talend Data Quality, **lifting first-pass validation accuracy to 98.6%** across recurring reporting inputs.
- Created interactive Sisense dashboards that visualized data defects from CRM and claims databases, categorizing them by severity, allowing business teams to prioritize issues with the greatest reporting risk.
- Escalated unresolved record mismatches to data owners with clear defect summaries, reducing back-and-forth and speeding remediation decisions.

CUNA Mutual Group – Junior Data Analyst

October 2023 - June 2024

Madison, WI

- Profiled member and policy data with OpenRefine, uncovering 27 formatting and duplication issues before they affected downstream reporting.
- Mapped business terms and lineage in Alation, facilitating accurate data reporting across 6 departments by providing trusted field definitions and approved sources.
- Documented validation steps, exception logic, and handoff notes, **reducing audit cycle times by 32 hours** for 14 monthly data requests.

EDUCATION

University of Wisconsin – Bachelor of Science, Computer Sciences

2018 - 2022

Madison, WI
