EDUCATION

Bachelor of Arts

Data Science

University of California

📅 2015 - 2019

📍 Berkeley, CA

SKILLS

- Matplotlib
- Microsoft Power BI
- ArcGIS
- Adobe Illustrator
- Shiny
- Unity3D
- Root-cause facilitation
- Metric design thinking

WORK EXPERIENCE

Senior Technical Data Analyst

Intuit

📅 April 2025 - current

📍 San Francisco, CA

- Reframed retention reporting with Matplotlib visual narratives that exposed churn pockets by segment, helping product teams **protect \$1.94M in renewal revenue**.
- Untangled conflicting lifecycle metrics across marketing, finance, and customer success, shrinking the reporting workflow from 11 handoffs to 6.
- Packaged onboarding behavior insights into launch-ready assets through Adobe Illustrator, contributing to a 4.2-point lift in stakeholder confidence scores.
- Elevated trust in subscription dashboards by tightening definition governance and exception handling, bringing audit-ready metric certification to 98.6% of tracked KPIs.

Data Analytics Senior Analyst

Salesforce

📅 October 2022 - March 2025

📍 San Francisco, CA

- Centralized campaign and pipeline visibility in Microsoft Power BI, giving regional leaders line of sight into 18 newly segmented funnel breakpoints.
- Pressure-tested funnel assumptions in Shiny so GTM partners could compare conversion paths interactively, supporting 6 planning cycles without offline rebuilds.
- Brokered alignment between sales operations and analytics on source-of-truth logic, helping teams absorb 27 requirement changes **without delaying quarterly reporting**.
- Surfaced lead-routing breakdowns early enough to protect rep coverage, cutting escalation volume by 22 cases per month.

Business Analyst

Uber

📅 January 2020 - September 2022

📍 Mountain View, CA

- Redesigned market-readiness analysis with ArcGIS to pinpoint high-friction pickup zones, improving geofence precision across 14 launch areas.
- Mocked curbside and rider-flow scenarios in Unity3D, helping operations teams retire 3 failed dispatch assumptions before pilot rollout.
- Flagged recurring support and dispatch exceptions before they scaled across city launches, reducing complaint reopen rates by 6.8 points.
- Clarified intervention priorities for local ops managers through cleaner performance reviews, **increasing recommendation adoption to 91.3%**.
