EDUCATION

Bachelor of Science
Information Systems
Carnegie Mellon University

📅 July 2019 - June 2023

📍 Pittsburgh, PA

SKILLS

- HDFS
- MapReduce
- Hive
- Spark SQL
- Spark Streaming
- MLlib
- Real-time data streaming
- Data pipeline integration

WORK EXPERIENCE

Data Engineer (Big Data)

Comcast Corporation

📅 January 2026 - current

📍 Philadelphia, PA

- Engineered HDFS ingestion layers for 4.3B quarterly event records, improving data availability for ad, subscriber, and network analytics.
- Optimized Spark Streaming pipelines to surface service-quality anomalies 11.8 minutes sooner, accelerating operational response during peak traffic windows.
- Hardened schema checks across telemetry and billing feeds, streamlining data reconciliation processes for 6 BI and reporting teams, *enhancing accuracy and efficiency*.
- Coordinated platform releases with analytics partners, improving reporting stability during high-volume product and campaign launches.

Data Analyst

Aramark

📅 July 2023 - December 2025

📍 Philadelphia, PA

- Built Hive reporting layers that standardized 37 dining-site KPIs, giving operations leaders cleaner labor, sales, and margin visibility.
- Mapped MapReduce outputs into trend analyses that *lifted forecast alignment to 96.2%* for regional demand reviews.
- Investigated sales and inventory mismatches to enable field teams to adjust inventory orders using real-time data insights before close-cycle reporting.
- Partnered with finance and operations stakeholders to standardize metric definitions for location performance, which enhanced data accuracy in reporting.

Data Analytics Undergraduate Intern

The PNC Financial Services Group

📅 March 2020 - May 2022

📍 Pittsburgh, PA

- Applied MLlib clustering to transaction-behavior patterns, helping mentors flag unusual account activity earlier for review.
- Queried Spark SQL datasets to reconcile branch and digital activity, improving consistency in analyst-ready reporting extracts.
- Produced detailed trend analyses that enhanced reporting accuracy for senior analysts, providing clearer insights into customer activity and channel performance.
- Conducted thorough quality assurance reviews on weekly dashboard reports, *reducing revisions by 31%* and ensuring accurate insights for stakeholders.
