EDUCATION

Bachelor of Science
Computer Science

University of Texas

📅 2011 - 2015

📍 Austin, TX

SKILLS

Hard skills

- Python (Automation & Scripting)
- GDB (Low-Level Debugging)
- PowerShell (Server Provisioning)
- OWASP ZAP (Security Auditing)
- MySQL
- Jira (Agile Project Tracking)
- GitHub (CI/CD & Code Review)

Soft skills

- Agile Team Leadership
- CIS Security Hardening & Compliance
- Cross-Office Migration Planning

WORK EXPERIENCE

Computer Programmer

Charles Schwab

📅 2020 - current

📍 Westlake, TX

- Automated trade reconciliation and reporting workflows in Python, reclaiming 8 hours weekly for the operations team.
- Led a 4-developer squad through Schwab's Agile adoption, **increasing on-time sprint delivery from 71% to 93%** within two quarters.
- Traced production defects in Schwab's brokerage platform using GDB, cutting unplanned system downtime by 17% year over year.
- Refactored legacy modules and enforced pull-request standards on GitHub, driving a 21% reduction in post-release bug reports.

Systems Administrator

Sysco

📅 2017 - 2020

📍 Houston, TX

- Administered a mixed Windows and Linux server environment supporting Sysco's distribution logistics, sustaining 99.97% uptime across 48 nodes.
- Scripted a PowerShell-based provisioning pipeline that standardized server builds, shaving 12 minutes off each deployment cycle.
- Hardened perimeter and endpoint configurations following CIS benchmarks, **decreasing security incidents by 32%** over 18 months.
- Monitored WAN performance across 3 regional distribution hubs using Nagios, trimming average network latency by 19%.

Help Desk Technician

Accenture

📅 2015 - 2017

📍 Austin, TX

- Elevated first-call resolution rates by 24% through structured remote diagnostic scripts, reducing average ticket re-open frequency to under 6%.
- Managed the on-premises-to-Office-365 email migration for Accenture's Austin office, completing the cutover two weeks early and \$5.4K under budget.
- Executed quarterly security audits with OWASP ZAP, identifying and remediating 22 critical vulnerabilities across client-facing web applications.
- **Tracked 137 concurrent IT projects** in Jira across multiple engagement teams, cutting milestone overruns by 11% through tighter sprint scoping.
