WORK EXPERIENCE

Data Science Manager

Cisco Systems

📅 November 2024 - current 📍 Research Triangle Park, NC

- Harvested insights from historical data using Snowflake, aiding sales strategies that drove a **\$511,784 revenue bump** in Q4
- Monitored project timelines and deliverables using Toggl, tracking over 396 hours of teamwork per month to ensure on-time completion of tasks.
- Led 12 data scientists and engineers to deploy machine learning models in IBM Cloud
- Spearheaded bioinformatics pipelines in R, analyzing 14TB of genomic data and accelerating health-tech research

Data Science Researcher

SAS Institute

📅 September 2022 - October 2024 📍 Cary, NC

- Used Jira to track research milestones and completed six data science projects two weeks early, **enhancing delivery timelines**.
- Executed XGBoost modeling to create four predictive models, uncovering actionable insights from over 9 million data rows.
- Streamlined data cleaning processes using Talend, reducing data inconsistency issues by 42%

Data Analyst

Red Hat

📅 June 2019 - August 2022 📍 Raleigh, NC

- Analyzed market data using R, developing predictive models that trimmed annual operational costs by \$206K
- Saved the marketing team 16 hours per week with pre-built Looker dashboards tailored to their needs
- Processed raw sales data using IBM Cloud tools, enhancing accessibility and expediting reporting by 14%
- Introduced GitHub for version control, improving collaboration among eight developers and **reducing code conflicts by 56 instances** over 3 months

EDUCATION

Bachelor of Science

Data Analytics

North Carolina State University

📅 2014 - 2018

📍 Raleigh, NC

SKILLS

- Looker
- IBM Cloud
- XGBoost
- Talend
- Toggl
- Talent calibration
- Change adoption leadership
