WORK EXPERIENCE

Lead Data Analyst

Allegheny Health Network

📅 June 2024 - current 📍 Pittsburgh, PA

- Optimized enterprise queries in SQL Server, trimming dashboard load time by 6.3 seconds for recurring hospital performance reviews.
- Mentored junior analysts on metric definitions and QA standards, *raising first-pass dashboard acceptance to 98.4%* across shared deliverables.
- Translated ad hoc findings into executive-ready summaries, helping care teams act sooner on throughput and capacity bottlenecks.

Data Analyst

U.S. Steel

📅 July 2022 - May 2024 📍 Pittsburgh, PA

- Integrated plant, inventory, and shipment feeds through Fivetran, reducing manual refresh work by 4.7 hours per reporting cycle.
- Modeled large production datasets in Apache Spark, enabling analysts to *reconcile 2.3 million* records without splitting workflows across systems.
- Consolidated recurring performance views on a weekly cadence, enabling timely adjustments to staffing and resource allocation for improved service delivery.

Junior Data Analyst

K&L Gates LLP

📅 September 2020 - June 2022 📍 Pittsburgh, PA

- Automated litigation support checks with Python, surfacing 31 record inconsistencies before data moved into case-review materials.
- Audited matter, billing, and document-tracking extracts, which *improved reporting accuracy* for 58 legal cases monthly.
- Documented field logic, validation steps, and exception notes using SQL and Python, ensuring accurate data flow among analytics and case teams for 3 key project milestones.

EDUCATION

Bachelor of Science

Data Science

Carnegie Mellon University

📅 2015 - 2019

📍 Pittsburgh, PA

SKILLS

- Sigma
- SQL Server
- Fivetran
- Apache Spark
- Python
- Requirements framing
- Stakeholder translation
