EDUCATION

Master of Computational
Data Science
Carnegie Mellon
University
July 2019 - May 2021
Pittsburgh, PA

Bachelor of Science
Applied Mathematics
Carnegie Mellon
University
July 2014 - June 2019
Pittsburgh, PA

SKILLS

NLTK
Prophet
Dask
dbt
MLflow
SHAP
Streamlit
Experimentation
oversight
Data integrity advocacy

WORK EXPERIENCE

Senior Data Scientist

Air Products and Chemicals, Inc.

January 2025 - current / Allentown, PA

- Spearheaded Prophet forecasting for bulk gas demand and plant load balancing, improving forecast accuracy by 8.7 MAPE points across regional planning cycles.
- Scaled process-optimization pipelines with Dask, trimming model run windows by 6.4 hours for engineering review packs.
- Institutionalized experiment tracking in MLflow, **preventing \$1.92M in duplicate** validation and rework costs across model releases.
- Analyzed model performance using SHAP, achieving a 3.1 basis point reduction in margin-risk drift ahead of quarterly operating reviews.

Data Scientist

Censora

June 2021 - December 2024 / Chesterbrook, PA

- Extracted service-level themes from distribution and support notes using NLTK, identified and categorized 19 recurring issue clusters, enabling network operations leaders to prioritize troubleshooting efforts.
- Rebuilt transformation logic in dbt, reducing audit exceptions to 4 across regulated reporting datasets.
- Delivered operational model insights through Streamlit, **moving replenishment decisions ahead by 2.8 days** during constrained supply periods.

Data Analyst

F.N.B. Corporation

July 2019 - April 2021 / Pittsburgh, PA

- Consolidated branch and digital-service inputs into a single variance view, shortening month-end issue triage to 27 minutes per case.
- Translated reporting requirements for finance and retail banking teams, expanding first-pass acceptance to 94.2% of submitted specs.
- Refined exception monitoring through automated alerts in account-maintenance activity, reducing errors to **1.8 cases per 10,000 records**.
